DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-7 and 12-15, drawn to a remotely controlled vehicle, classified in class 446, subclass 454.
- II. Claims 8-10, drawn to a method of moving a plurality of model vehicles in formation, classified in class 446, subclass 95.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). The product as claimed can be used in a materially different process using that product. In this instance, the remainder of the plurality of model vehicles does not have to be coupled.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

A telephone call was made to Mr. Eric Lamorte on 02/20/04 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 3712

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
